DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. **Claims 1-13**, drawn to an apparatus for analysis of a complex system, classified in class 702, subclass 182.
- II. **Claim 14**, drawn to a method for pruning a neural network, classified in class 706, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are an apparatus for analysis of a complex network and a method for pruning a neural network.

2. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

3. During a telephone conversation with Martin Moynihan on July 10, 2006 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-13. Affirmation of this election must be made by applicant in replying to this Office action. Claim 14 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Art Unit: 2857

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

EXAMINER'S AMENDMENT

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Martin Moynihan on July 10, 2006.

The application has been amended as follows:

Claim 14 is cancelled.

Allowable Subject Matter

1. **Claims 1-13** are allowed.
2. The following is an examiner's statement of reasons for allowance: Feldman teaches a method and system for using cooperative game theory to resolve statistical joint defects. The prior art of record does not teach an apparatus for analysis of a complex system comprising elements, to determine the effective elements of a system in carrying out a given task, the apparatus comprising: a predictor for providing predictions for predicting results for the given task for further element silencing

combinations, and a contributions calculator for using said measured results and said predicted results to generate Shapley value predictions for said elements as indicators of an effectiveness of a respective element in carrying out the given task.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
